Attn: Jerry Glenn, Asst. City Manager

Recently a number oi neighborhood boys found a junked refrigerator floating down the river and pulled it over to a bank, carried it out to the street and loaded it onto my pickup. The refrigerator ~~was~~ on its way to the lake or the dam. It is not unusual to find regular ~~amounts~~ of various trash coming down the river usually dumped from the back of ~~trucks~~, cars or carried in, in spite of the recent News-Sentinel articles implying that unsupervised public access may be acceptable or at least not a problem.

To assist in ~~its~~ disposal I contacted Ms. Annette Murdaca at the transfer station. She ~~was~~ most cordial, helpful and provided a complementary disposal card for it. Her prompt attention very likely eliminated a major hazard to the City and\ or the Woodbridge irrigation district.

While at the transfer station, I was most impressed by the additional efforts they are doing in recycling, dust control on the grounds, and vehicle cleaning.

I ~~am~~ extending my thanks to Ms Murdaca and the facility through this note. Thanks ~~for any compliments you may extend as well.~~

John Kindseth
